Why learn Excel?

Microsoft Excel is the everyday tool of offices, finance teams, small businesses and classrooms. This online programme takes you from opening your first workbook to building formulas, tables, charts and a complete mini-project, in clear, practical steps with hands-on practice in every session.

Who is this course for?

- Students and fresh graduates preparing for their first job
- Office staff, admin, HR, finance and operations professionals
- Small business owners tracking sales, stock and expenses
- Anyone who has used Excel casually and wants proper, structured skills

What you need

- A laptop or desktop with Microsoft Excel installed
- A stable internet connection for online sessions
- No prior Excel experience required; if you can use a computer, you can start

What you will be able to do

- Create, organise, save and share professional workbooks
- Enter and format data quickly with AutoFill, Flash Fill and number formats
- Turn raw lists into tables and answer questions with sort and filter
- Build formulas and use functions such as SUM, IF, ROUND and lookups
- Present results with clear charts, sparklines and conditional formatting
- Complete a real, end-to-end mini-project in Excel

Programme at a glance

Level	Beginner to Intermediate	Duration	30-40 hours
Structure	8 parts, 20 sessions	Mode	Online, instructor-led
Session length	About 1.5 to 2 hours	Finish with	Capstone mini-project

Curriculum overview

Eight parts, 20 sessions, each built around a real task you can use at work.

PART 1	Getting Started with Excel	2 sessions
Understand what a workbook is, open and create files, and save your work safely.		
S1	Workbooks, Worksheets and the Excel Window	
S2	Saving Your Workbook	
PART 2	The Ribbon and Navigation	2 sessions
Find every tool quickly by understanding the Ribbon, formula bar and navigation shortcuts.		
S3	Working with the Ribbon	
S4	Formula Bar, Name Box and Selecting Data	
PART 3	Managing Your Worksheets	2 sessions
Organise multi-sheet workbooks the way professionals do.		
S5	Sheet Tabs: Add, Rename, Reorder, Delete	
S6	Organising and Protecting Multi-Sheet Workbooks	
PART 4	Entering and Formatting Data	3 sessions
Enter data cleanly, speed up repetitive entry and make worksheets easy to read.		
S7	Entering, Editing and Filling Data	
S8	Column Width, Wrap Text and Cell Styles	
S9	Number Formatting	
PART 5	Organising Data with Tables, Sort and Filter	2 sessions
Turn plain ranges into tables and find answers by sorting and filtering.		
S10	Excel Tables	
S11	Sorting and Filtering	
PART 6	Calculations and Functions	4 sessions
Move from quick totals to formulas and the functions professionals use daily.		
S12	AutoSum and Quick Analysis	
S13	Formulas and Cell References	
S14	The Function Library and Insert Function	
S15	Logical and Lookup Functions (Intermediate)	
PART 7	Charts and Visual Analysis	3 sessions
Present data clearly with charts, sparklines and conditional formatting.		
S16	Building Your First Chart	
S17	Customising Charts	
S18	Sparklines, Conditional Formatting and PivotTable Preview	
PART 8	Saving, Sharing and Capstone	2 sessions
Share your work with confidence and apply everything in a final project.		
S19	Saving, Sharing and Presenting Your Work	
S20	Capstone Project and Welcome to Excel	

How you will learn

- **Learn by doing:** every session includes at least two practical activities in Excel
- **Clear objectives:** each session opens with what you will be able to do by the end
- **Quick check:** a short understanding check closes every session
- **Real scenarios:** budgets, sales lists, invoices and reports rather than abstract exercises
- **Capstone:** finish by building and presenting your own business workbook

A taste of what you will practise

Task	Excel skill
Total a month of sales in two clicks	AutoSum, Quick Analysis
Show only orders above a target quantity	Tables, Number Filters
Mark students as Pass or Fail	IF function
Present monthly trends to your manager	Charts and sparklines
